MediaCom Edinburgh awarded prestigious Greenmark Certification

DIANE BRUCE - OFFICE MANAGER 30 MAY 2019

Given the current state of the planet it has never been more important for individuals and businesses to ensure they are as environmentally friendly as possible. We at MediaCom Edinburgh take this very seriously and so are delighted to announce that we have been officially awarded the Green Mark (Level 1) Certification.

Greenmark provides an internationally recognised environmental certification for companies who want to assure clients and employees that they are conducting business to recognised environmental standards. Based on Greenmark's rigorous assessment, MediaCom Edinburgh were certified to have measured, managed and reduced carbon emissions and that going forward were fully committed to further reduce emissions year on

year.

This is a fantastic achievement for us. Staff here have worked long and hard to reduce carbon emissions and then produce the information necessary to be awarded Greenmark certification.

David Shearer, Managing Director said:

“We are delighted to have achieved Greenmark certification. It is a great way of showing that we have taken action on climate change and a way to communicate our environmental credentials to those that matter.”

As a re-certification will be required to retain our Greenmark certification, work is already underway to develop a new one-year strategy. This will include identifying further cost-effective energy-saving opportunities, continuing our investment to make the business greener and setting new targets around carbon reduction.
